General Approval of a Freight Container Securing Fitting

Test

The prototype tests have been witnessed by the Society's Surveyors and reported in certificate dated 28.09.2026.
The function test dated 22.09.2026 at Drehtainer GmbH has been witnessed by Specialists from Hamburg TSO.

Other Conditions

This approval is granted subject to the following conditions and operational restrictions:
a) Special attention is to be paid if separation forces are calculated to occur simultaneously at both corners of a container end wall (either door or closed end) for any of the ship motions as given in as in Part 3, Chapter 14, Section 8.2.3 of the Rules, i.e. roll, pitch or combined motions as applicable. If separation forces are calculated additional securing fittings, e.g. lashing rods should be applied.
b) The fitting is generally not permitted at the bottom tier of all containers stowed on deck or on hatch covers and bridging hatch covers and container stanchions.
c) If the fitting is used as securing element as part of a Cargo Securing Manual the Manual is to include the information regarding the limitations stated in paras. a) & b) above.
d) The approval of the fitting will remain to be subject of satisfactory service experience, and Lloyd's Register reserves the right to require remedial measures if service experience should show reasons for concern.

Fittings are to be installed in accordance with the approved plans and operated in accordance with the Manufacturer's recommendations and directions. This certificate is valid until the expiry date or any relevant changes to our rules, whichever comes first.
