Lloyd's Register Group Limited, its affiliates and subsidiaries and their respective officers, employees or agents are, individually and collectively, referred to in this clause as 'Lloyd's Register'. Lloyd's Register assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

Type Approval Certificate

to manually synchronize this controller:

4.
   - When installed on a Lloyds Register Classed ship, the essential services power demand is not to exceed power output of a single generator.

Auxiliary engines intended to drive electric generators forming the ship's main source of electrical power fitted with a single electronic control module are to be used in multiple generator set applications.

This certificate is not valid for equipment, the design, ratings or operating parameters of which have been varied from the specimen tested. The manufacturer should notify Lloyd's Register Canada Limited of any modification or changes to the equipment in order to obtain a valid Certificate.

The Design Appraisal Document No. LR2002502TA and its supplementary Type Approval Terms and Conditions form part of this Certificate.
