Lloyd's Register Group Limited, its affiliates and subsidiaries and their respective officers, employees or agents are, individually and collectively, referred to in this clause as 'Lloyd's Register'. Lloyd's Register assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

Type Approval Certificate

Regulations for the Classification of Ships, Part 5, Chapter 14.

2. The automatic filter and manual filter change over unit is to prevent inadvertent opening of both automatic and manual filter, It shall be clearly visible which filter is in operation. The changeover unit is to be made such that only one filter can be used at any given time.
3. A means of measuring and monitoring differential pressure across the filter is to be provided to avoid the total blocking of the filter may lead to loss of propulsion or power generation.

This certificate is not valid for equipment, the design, ratings or operating parameters of which have been varied from the specimen tested. The manufacturer should notify Lloyd's Register EMEA of any modification or changes to the equipment in order to obtain a valid Certificate.

The Design Appraisal Document No. LR2442527TA and its supplementary Type Approval Terms and Conditions form part of this Certificate.
