Other Conditions

Where the tube fittings are intended to be installed on a ship classed with LR, the following conditions of acceptance will be applicable:
1) The fittings are to be installed in accordance with the manufacturer’s instruction.
2) Attention is drawn to Section 1.3.6 of IMO MSC/Circ.1321- Guidelines for measures to prevent fires in Engine-Rooms and Cargo Pump-Rooms which describes that compression couplings require careful attention to tightening procedures and torques to avoid leaks or damage to the pipe when subjected to over-tightening and they should not be used in the fuel supply line of the (oil engine) injection pumps and spill system.
3) Fire testing will be requested where the effects of fire could lead to leakage in a flammable fluid system or in a system which, following failure of the joint, could lead to danger due to possible flooding or loss of integrity of an emergency shut-down or control system.
4) Coupling with seal of non-metallic materials are not covered in this approval.

This certificate is not valid for equipment, the design, ratings or operating parameters of which have been varied from the specimen tested. The manufacturer should notify Lloyd's Register Marine and Offshore India LLP of any modification or changes to the equipment in order to obtain a valid Certificate.
